SKILLS

- UX / UI Design
- Usability Testing
- Design Systems
- Responsive Design
- Accessibility
- User Interviews

ABOUT ME

I am a UI/UX and Product Designer focused on turning real-world problems into intuitive, user-centered digital experiences. Hands-on experience through a UI/UX internship and independent projects, with skills in user research, user flows, information architecture, wireframing, prototyping, usability testing, and visual design in Figma. Strong focus on simplifying complex problems into clear, accessible products that balance user needs with business goals.

EXPERIENCE

UI/UX Design Intern | Tutedude | May 2026 - Sept 2026

- Completed UI/UX design assignments focused on user-centered design, usability, and visual problem-solving.
- Designed Clean Basket, a laundry service app concept for hostel/PG residents and working professionals.
- Created user flows, wireframes, prototypes, and UI screens using Figma.
- Iterated designs based on feedback and usability considerations.

SELECTED PROJECTS

Rapido - No-Network Booking Experience | Independent UX Concept

- Identified the challenge of ride booking during low/no network connectivity and explored a continuity-focused experience.
- Explored an OTP-based booking flow for initiating ride requests when internet connectivity is unavailable.
- Designed the end-to-end flow covering ride initiation, OTP verification, booking confirmation, and connectivity recovery.
- Created wireframes and UI concepts focused on simplicity, accessibility, and minimal interaction under constrained network conditions.
- Considered edge cases including network loss, failed requests, delayed connectivity, and booking confirmations.
- Shared the concept on LinkedIn and received feedback and suggestions from senior UI/UX designers

World Watch - Global Crisis & Relief Platform | Independent UX/UI Project - In Progress

- Designing a centralized platform to organize information about wars, natural disasters, affected regions, casualties, and relief needs.
- Defined the core user journey for discovering crises, understanding severity, exploring affected locations, and identifying support opportunities.
- Designed information architecture for crisis updates, affected regions, casualties, critical needs, and relief opportunities.
- Exploring location-based discovery and clear visual representations to make high-volume crisis information easier to understand.
- Creating donation and relief-support flows while applying visual hierarchy, accessibility, responsive design, and user-centered design principles.
- Iterating the experience to simplify complex information while maintaining a clear path from crisis discovery to user action

CERTIFICATIONS

- UI/UX Design - Tutedude (IIT Delhi Initiative), September 2026
